DESKTOP TO ONEDRIVE

01

Protect Against Data Loss
Desktop computers often contain critical data, such as financial, customer, or project files. Bacup your desktop to protect them.

02

Compliance
Certain Industries require information to be backed up, such as HIPAA requiring the backup of Electronic Patient Information.

03

Disaster Recovery
Disasters can easily destroy desktop computers and their data. By backing up your desktops businesses can recover from any disatster.

04

Remote Work
Backing up your desktop allows you to seamlessly transition to and from remote work. This is critical for anyone working hybrid.

05

Cost-Effective
OneDrive is one of the most cost-effective ways to back up your data. It simply needs to be turned on to be implemented organization wide.
