

DOOR ACCESS

01

Security

Provide an additional layer of security to businesses by allowing only authorized individuals to enter a building or a specific area inside.

02

Access Control

Allows you to control who has access to different areas. Ensures certain areas such as server rooms are protected from mishaps.

03

Audit Trail

Can provide an audit trail of who has entered or exited a certain area, allowing you to detect security breaches or suspicious activity.

04

Convenience

Can be more convenient than more traditional keys, as opposed to carrying a key ring you may only need one fob or access code.

05

Integration

Can be integrated into other security systems such as surveillance or alarms to give you a more comprehensive security system.
