

PHISHING TRAINING

01

Protect Sensitive Data

Helps teach your employees how to recognize the signs of an attack and how to avoid them. Track their progress along the way.

02

Protect The Business

Phishing attacks often target businesses across a broad front. Leading to the loss of sensitive company information.

03

Reduce Financial Risks

By learning how to recognize and avoid phishing attacks you avoid financial scams, fraudulent transactions, and data breaches.

04

Compliance Requirements

Some industries require phishing training for their employees, or it can be used to help get a lower rate on business insurance.

05

Enhance Awareness

Help raise awareness about cybersecurity and all of the threats an organization faces, creating a culture of awareness.
