

# TEAMS

01

## Centralized Communication

Teams provides you with a centralized hub for communication, allowing you and your employees to use one channel for all communications.

02

## Real Time Collaborations

Teams allows you to work together on projects and tasks in real time regardless of location. This increases productivity!

03

## Integration

Integrates with tools like Sharepoint, OneDrive, and Office365. This allows you to have all of your tools in place company wide.

04

## Customization

Customize it to fit your specific needs, employ custom apps, bots, and workflows, giving you the flexibility, you have always dreamed of.

05

## Security

Teams provides enterprise level security features such as MFA, data encryption, access controls, and data backups.
